

# ALASKA RELAY NEWSLETTER

WINTER/SPRING 2019

## NEW!

## iPad® Pilot Program

### GOAL

Supporting Alaskans who are d/Deaf, hard of hearing, or speech-disabled to access distance communication through tablets and appropriate applications (apps).

### EXAMPLES

Telecommunication use under the iPad Pilot Program:

- Video Relay Service
- IP Relay or Captioned Telephone Service
- Video calls through FaceTime or Skype
- Access distance communication via non-symbol based Alternative Augmentative Communication (AAC) Applications. Individuals must be able to use text-based communication.

Completion of an application to the Pilot Program does not guarantee approval. If not approved, eligible applicants will be placed on a waitlist for future review. The iPad Pilot Program is dedicated to distributing devices throughout every region of Alaska to qualified individuals.

Paid for by Alaskan telephone users. iPad® is a registered trademark of Apple, Inc.

### Sprint IP Relay

Type what you want to say to the operator, the operator relays the message to the person you called and then types their response back to you. App shown above.

### AVA

Provides real time captions by capturing audio from a conversation and translating it into text.

### Glide

A video messenger that allows you to send and receive video messages that can be seen live (as you're recording) or later (like a text message).

### Predictable

Speaks out the messages as they are typed giving a voice to someone who is unable to use their own.

### Proloquo4Text

A simplified text based communication app for those with strong literacy skills needing a means for communication.
