What is Speech-to-Speech?

Speech-to-Speech (STS) service allows people who have a speech disability or use an assistive voice device to make and receive phone calls.

STS Communications Assistants (CA) are specially trained to understand speech patterns and repeat your words as needed for clarity to ensure you are heard and understood.

How to make your STS call:

- Dial 711 or 866-355-6198 and provide the person's telephone number you want to call.
- After making the connection, you speak on your phone directly to the person.
- Upon your instruction, the CA will repeat what you said to the person as needed for clarity.
